Introduction to Functions

High School Algebra

Instructor: Ben Huang

Why Functions?

[Intro to Function](#)

B.H.

[why functions](#)

[representations](#)

[exercises](#)

Relations are everywhere.

Why Functions?

[Intro to Function](#)

B.H.

[why functions](#)

[representations](#)

[exercises](#)

Relations are everywhere.

Mathematics is to study relations quantitatively.

Why Functions?

[Intro to Function](#)

B.H.

[why functions](#)

[representations](#)

[exercises](#)

Time - Position Relation

Input: time Output: position

Why Functions?

[Intro to Function](#)

B.H.

[why functions](#)

[representations](#)

[exercises](#)

Time - Position Relation

Input: time Output: position

Why Functions?

[Intro to Function](#)

B.H.

[why functions](#)

[representations](#)

[exercises](#)

Neural Network - a fancy way to discover relations

Input: pixels

Output: the recognized number

Why Functions?

Intro to Function

B.H.

why functions

representations

exercises

Event - Probability Relation - the endeavor to understand randomness

Input: event Output: probability

Function Representations

[Intro to Function](#)

B.H.

[why functions](#)
[representations](#)
[exercises](#)

input from the domain → rule → **unambiguous** output in
the range

Exercises

[Intro to Function](#)

B.H.

[why functions](#)

[representations](#)

[exercises](#)

Time to get your hands dirty!
